About the Brand

Beauty Med is growing and expanding its beauty services and product businesses. It holds a leading position, meeting a growing range of business needs for partners and consumers. This creates a convenient, efficient ecosystem that delivers practical value and benefits, strengthened by its versatility, relevance and expertise. These values support the master brand, making it stronger and more dynamic. The new name, BEAUTY ecosystem, embodies a proactive, growth-oriented approach to business, expertise, care and comprehensive solutions.

Logo

The primary brand logo combines modern and classic elements, reflecting our approach to work.

Logo

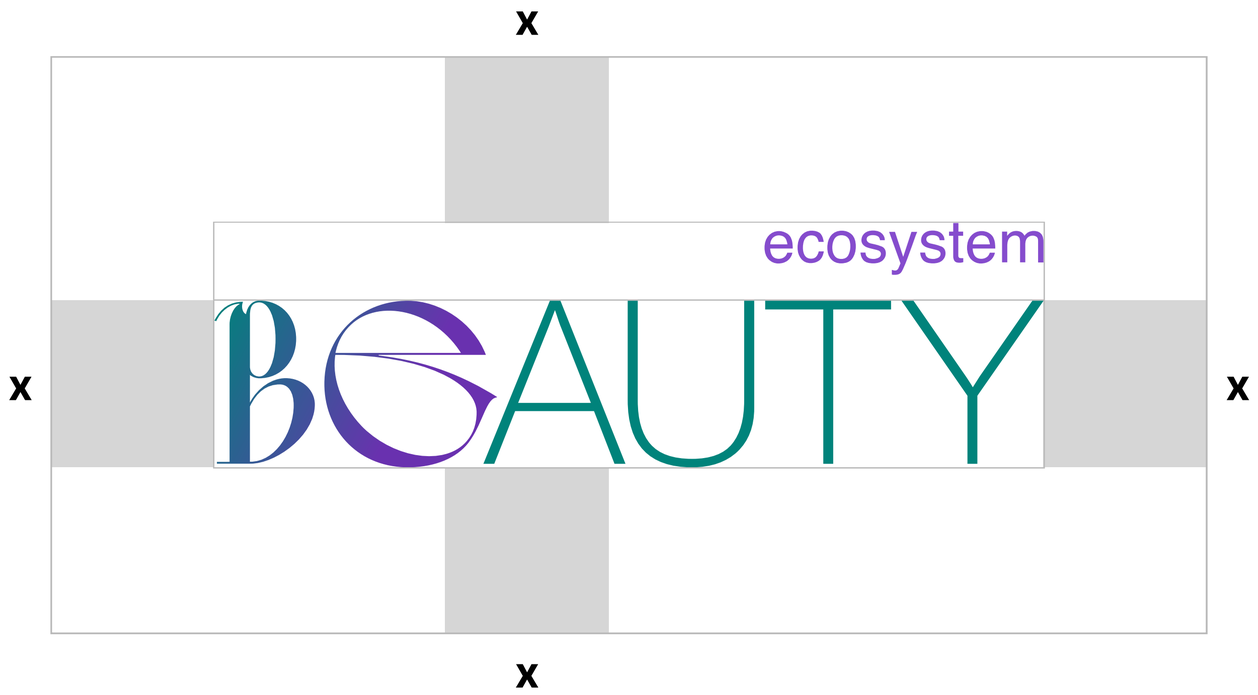

Primary Logo

Brand Assets Folder

The logo consists of the company name and a descriptor identifying the ecosystem service.

Clear Space

Clear space is the area that must remain free of other layout elements. The space around the logo is defined as x, equal to the height of the letters E and U.

Minimum Logo Size

Print

When preparing artwork for print, ensure the lines in the descriptor are at least 0.2 mm thick.

Digital

For digital formats, the minimum logo width is 200 px.

Logo

Brand Mark

Brand Assets Folder

The brand mark is a shortened logo with the letters BE and a descriptor beneath them. It can be used across various design applications.
Minimum digital size: 80 px.

min 80 px

Logo

Reversed Version

Use the reversed logo on dark backgrounds. Reversed versions are also available for the brand mark and all service logos.

Cropping Guidelines

The brand mark can be used as a background pattern across various design applications.

The key rule is to crop it so the letters BE remain recognizable.

✓ Both letters retain their key recognizable features.

✓ Both letters retain their key recognizable features.

✓ Both letters retain their key recognizable features.

✗ Too little of the mark is shown. The B is unrecognizable.

✗ Only one letter is shown.

✗ Cropped too tightly: the horizontal bar of the E is missing.

Approved Background Use

The logo works best on a light, solid background. Non-solid backgrounds are allowed if the logo remains clearly legible. Use the reversed logo on dark backgrounds. On busy backgrounds, add a white panel that covers the logo's clear space.

Incorrect Background Use

Do not place the logo on overly busy backgrounds without a white panel covering its clear space. Do not use the primary logo on dark backgrounds that are close to the logo colors or too far from the brand palette. Do not use the reversed logo on very light backgrounds.

Ecosystem

The company’s professional expertise and brand equity are expressed through the visual and conceptual architecture of its identity, based on an ecosystem approach. It brings together and conveys the master brand’s attributes and values while giving individual services and business areas a distinct identity within the ecosystem and the competitive landscape.
The branding has two key pillars—expertise and innovation—and is designed to scale.

Brand Assets Folder

Services

Each service has its own color palette and a dedicated descriptor in the logo.

Color Palette

BEAUTY ecosystem has an extensive color palette that enhances a wide range of design applications.

The palette is designed to make the brand look its best in both print and digital formats.

Each ecosystem service has its own palette to distinguish its function and emotional character.

Brand Assets Folder

BEAUTY Gold

For digital use, gold is represented by a ready-made grainy gradient included in the brand guidelines assets.

If needed, create it manually by making a gradient background and adding grain.

In print, gold is reserved for special occasions. Depending on the printer's capabilities, use gold foil stamping, screen printing or digital printing with gold inks.

The digital gradient is not recommended for print.

Typography

Brand Assets Folder

Typeface

Helvetica Bold For Headings

Helvetica Light For Body Text

The Helvetica font family is used across all brand materials. Bold, Light and Regular styles may be used as appropriate. For materials where the brand typeface is difficult to use, such as documents or presentations, Arial may be used as a standard alternative.
